

# ANJALI SCHOLARSHIP PROGRAM

OCTOBER 2025

The inaugural class of Anjali Scholar Enrichment Program (Batch 2025–26) was successfully conducted on 19/10/2025 at 11:30 am. The session focused on Indian Geography, a core subject critical to strengthening students' understanding of the nation's physical landscape, natural resources, and regional diversity, key components for competitive and higher education examinations.

The Resource person, Sambit Kumar Das, who is a Banker, a member of the Governing Body and is visually impaired, delivered a well-structured and engaging lecture aligned with the academic requirements as well as for competitive examinations. Twenty-three scholars attended the session through a virtual platform and demonstrated active engagement through questions and discussion.

This session marked an important step in the Anjali Scholars Programme, underscoring our commitment to providing structured, high-quality, and expert-led academic support to students from diverse and underserved backgrounds.
